Presented by the WCM Department of Pathology and Laboratory Medicine
This course is designed to update physicians on advances in our understanding of gastrointestinal diseases, address problems faced during the pathologic evaluation of tissue specimens obtained from the gastrointestinal tract, pancreas, and liver, and inform them regarding the application and interpretation of immunohistochemical and molecular studies in the diagnosis and classification of these diseases. Participants will be exposed to lectures, note reviews, and reference citations will be available online.

Target Audience
Surgical pathologist and pathologist-in-training.

General Information
The tutorial consists of five days of lectures, case presentations and discussions designed to provide attendees with an in-depth discussion of diagnostic problems that arise when evaluating materials obtained from the gastrointestinal tract, pancreas, and liver, and inform them regarding the application and interpretation of immunohistochemical and molecular studies in the diagnosis and classification of these diseases. Participants will be exposed to lectures, note reviews, and reference citations will be available online.

Seating at the program is assigned on a first-come, first-served basis registration fee will increase to $1,375 for all requests postmarked after October 6, 2018. Print the handouts. You may also opt to view the materials online during the course. Use of cell phones or video/audio recording during the lectures is strictly prohibited.
